As a software developer, I design, develop, and maintain cloud-based web applications. Throughout my work, I have been involved in developing software solutions for the electricity trading, logistics, and retail sectors.

Efficiency is my top priority, while consistently maintaining a high level of quality. To achieve this, I actively leverage the possibilities offered by modern technologies, and recently I have been particularly focused on using AI-based development tools.

EXPERIENCE

.NET Developer

July 2022 –

Insiron Informatika Kft., Budapest

Trainee

May 2021 – Sept 2021

Xellia Pharmaceuticals Ltd. Budapest
